

Good evening , Toastmasters and Guests,

I am Chrispin Cheung, I am not only a member of Beihang TMC, but also act as an officer of Red Hat TMC.

Can you guess my role in Red Hat TMC? Any ideas?

Thanks our President and other Officers, it seems most of you knew that I am the present president of Red Hat TMC.

I started to work as a Quality Engineer at Red Hat Inc at June 13th,2017. And I had been a regular member in the Red Hat TMC since Oct 1st,2017.

There are so many distinguished speaker in our TMC, and many member is older than me, they are more qualified to be the president of this TMC.

So When i be the president, I feel so excited but also stressful.

I just wonder that whether am i a good leader to lead our club to be better?

To understand my own leadership sytle, I did the Discover Your Leadership Style questionnaire,and get my scores of the ten Leadership Style.

The Maxium score of each Leadership style is 24.

As you can see, the score of Democratic and coaching and Innovative,affiliative is quite high.

it describes that i am a democrating leader. I am comfortable allowing others to occasionally take the lead.

I am also a coaching leader, I tend to motivate others by encourage them to realized their full potential.

I like cooking, so I want to take cooking for example.

Suppose i am the chef of a restaurant , and Michael is the assistant cook , and Cynthia is kitchen staff.

To make the restaurant work better, I am the man who need to find the value of the restaurant, and make the specialty first, then I will tried to communicate with Michael and Cynthia, I think I got some new idea to make a new cuisine. Would you want to give some suggestion, if it tastes good,

let us make this as a new recipes of our restaurant.

And I can make you master this new cuisine in future.

Then Cynthia also saw that how i cook this new cuisine, so she also will growth up more faster.

I believe that both of them will be competent to be a chef, even they left my restaurant in future.

there are some key attributes of a successful leader as the slides shows.

Even i am a good leader now, but I think i will be a good leader in future.

How about you?
